

# TL2654 Feedthrough Filter

This single line, high performance feed-through filter provides excellent EMI/RFI protection. Offering high attenuation. This is an economical alternative to dedicated filter units, where multiple input or output power lines require suppression.

Current Ratings: 100 Amps  
Operating Voltage: 440VAC / 600VDC (TL2654)

## TYPICAL APPLICATIONS

- Screened rooms.
- High frequency welding equipment.
- Power supplies.
- Telecom systems.
- Medical Applications.
- Military.

## ELECTRICAL SPECIFICATIONS

- Rated voltage ( $V_R$ ): 440VAC 50/60Hz
- Rated current ( $I_R$ ): referred to 40°C
- Insertion Loss (dB.): see table
- Climatic category: GPC (40/085/56);
- Temperature range: -20°C to +70°C

## MECHANICAL SPECIFICATIONS

Manufacture: brass case and stud that is tin plated; Metric stud, nut and washers (L2654)

**Connections:** Metric M6 full nuts, spring washers, plain flat washers and threaded M6 bar.

Note: on screwing the cable to the filter, the lock nut must be held in position to avoid a torque to the threaded bar inside the filter.

## TECHNICAL ADVANTAGES

Current rating 100A.  
Excellent attenuation up-to 1GHz.  
Rugged resin sealed construction.  
Flange-mounting.

## TECHNICAL SPECIFICATIONS

Part no.	In (A)	VAC/VDC	Cp (uF)	Temperature Range C	Dimensions (mm)
